EDUCATION :

Bachelor of Engineering (CSE)	**Percentage : 76.3%**
C. BYREGOWDA INSTITUTE OF TECHNOLOGY	2025
Pre-University College (PCMB)	**Percentage : 81.6%**
MAHILA SAMAJA PU COLLEGE	2021
SSLC	**Percentage : 90.4%**
JANATHA HIGH SCHOOL	2019

TECHNICAL SKILLS :

Backend Languages :- Python

Web Technologies :- HTML5, CSS3, JavaScript.

Database :- MySQL

Web Frameworks :- Django, Flask.

Core Competencies : REST API, AIML, DS(List, searching, sorting)

PROFESSIONAL SUMMARY :

- Proficient in **Python, Flask, Django,** and full-stack web development and designing websites through **flask and Django frameworks.**
- Having some knowledge on AIML basics and hands on experience of ML models.
- Hands on workout through the hacker rank and leet code problems on **sql, python.**

INTERNSHIPS :

Intern | **AI & ML** | **ROOMAN TECHNOLOGIES**   **Sept 2024 – April 2025**

- Hands on workout on python and machine leaning algorithms deploying using the git also the IBM cloud deployment.
- Improvised the communication and intrapersonal and interpersonal skills in Wadhwani foundations life skills course and completed the course with 97%.

Intern | **FULL-STACK WEB DEVELOPMENT** | **MIT ACADEMY**   **NOV 2023**

- Gained the knowledge on the full-stack web development technology basics and hands on practice of web technologies like HTML and CSS.
- Mentoring the group members and friends by involving other projects and guiding them for achieve goal.

Intern | **CORE JAVA** | **PROGTON TECHNOLOGIES**   **Oct 2022**

- Hands on Workout of core java and building small projects like **Pizza order bill generator** and gained knowledge on making replica websites perform same functionalities.
- Knowledge gained by building own project of backend working of **Banking System** using **Threads.**
- Responsible for handling errors and bugs making it flexible works on **Creating the user account, login and check balance, withdraw and deposit** operations.

PROJECTS :

Project #2 : IOT BASED CROP RECOMMENDATION SYSTEM USING ML: Python | **Flask library** | **ML** | GitHub Link

- Designing and ideology for building frontend dashboards and collecting resources, gaining the knowledge on modern forming through the technology by performing **Project Team Lead** and handling team members.
- Get a knowledge on **sensors** through reading the literature paper, articles in internet and enhancing skill on report making.

Project #1 : EMAIL SPAM DETECTION : Python | **Machine Learning** | GitHub Link

- Responsible for handling and detecting errors, finding bugs by trial and error method.
- Managing and leading the team for complete the assigned tasks.
- Preparing the reports and power point presentation slides and distribute tasks in team.

INTERPERSONAL SKILLS :

- Effectively leads and guides team members to achieve common goals.
- Creates an open and effective communication environment to clearly exchange ideas.
- Ability to identify the root causes of complex issues and develop effective solutions.
- Plans and prioritizes tasks to ensure project completion within deadline.

CERTIFICATION :

- Currently pursuing **Python full-stack** course at **Pentagon Space.**
- **IOT Based Crop Recommendation System using Machine Learning** project paper published at **7th National Conference on Recent Trends in Engineering Science and Technology** conducted in CBIT, Kolar.
